## = Ineligible because gross income is at or above 200% of the federal poverty level (FPL) for household's size.

\*Note on child care: The examples use sample monthly child care costs. A family can claim the ACTUAL childcare expenses. .

The SNAP figures above assume: (1) all household members are eligible for SNAP; (2) all of the household income is *earned* income; (3) there are no household members who are elderly (age 60+) or disabled.

These figures were produced using the following calculation:

**Gross income to net income:**

- (-) 20% of gross income: Allowed for ALL households
  - (-) Standard deduction: Capped at \$164 for households of 1-3, \$174 for households of 4, \$204 for households of 5
  - (-) Shelter deduction: Table A – no shelter expenses claimed. Tables B and C – math includes max shelter deduction of \$552
  - (-) Child Care deduction: Table C – math includes sample of either \$300 or \$600/month (no max limit on dependent care)
- = *Net income after allowable deductions*

**Maximum SNAP allotment for household size:**

- (-) Net income x 0.3 is subtracted from max SNAP allotment based on household size
- = SNAP monthly benefit for household based on income and size
